

## Univac-IP

Medium Voltage Contactor Motor Starters / Feeders  
Vacuum Circuit Breakers

### Product Range:

B&F's Univac range includes a wide range of configurations, including: - Fused Vacuum Motor Starters, Feeders, Vacuum Circuit Breakers (VCB's), plus intelligent motor management and low height options.

### Applications:

Univac-IP is suitable for switchboards covering a range of process industries and power generation applications.

### Product Highlights:

- \* Metal-enclosed, incorporating many safety & serviceability design features, including Arc Fault Containment
- \* All-welded enclosure manufactured from 2.5mm thick Grade 316 stainless steel
- \* Houses withdrawable fused contactor truck, circuit earth switch, vacuum circuit breaker (VCB) etc., as required.

### Further benefits:

- \* Full mechanical interlocking of compartment door, including withdrawable fused truck and earthing switch
- \* High plant integrity and reliability of service
- \* Flexible modular design
- \* Ingress protection to IP66 as standard
- \* Full compliance with National / International standards.

## Univac-IP MV Motor Starters, Transformer Feeders, Vacuum Circuit Breakers

Ratings	@ 3.6 kV	@7.2 kV
Motors	2100 kW	3400 kW
Transformers	2572 kVA	3600 kVA
Capacitors	1543 kVAr	3086 kVAr

Dimensions	Height = 2300 mm	
	Width = 750 mm	
	Depth = 1500 mm	(Optional cable box, +300 mm)

Construction 2.5mm all-welded Grade 316 Stainless Steel
