

## **BAFFLO** Closed Loop Cooling System for VSD's

### **Product Range:**

BAFFLO is a closed loop cooling system specifically designed for use with B&F's water cooled variable speed drives (VSD's).

### **Applications:**

BAFFLO can complement any B&F VSD installation. Applications for these systems include: - belt conveyors, pumps, machine traction, and armoured face conveyors.

### **Product Highlights:**

- \* Highly efficient cooling via pump & fan assisted system
- \* Straightforward to install & maintain
- \* All-welded steel construction for strength & ruggedness
- \* Integral electrical protection for pump & fan drives

### **Further benefits:**

- \* 'Single box' solution for cooling of variable speed drives (VSD's)
- \* Recycling of coolant means no header tanks, outflow, or waste water issues
- \* Allows VSD systems to be used where no mine water supply is available.

### **Certification:**

All B&F products are ATEX & IEC certified. In addition, we are able to offer country specific certification where required.
