

MineNet – Product Capabilities

Coal Face and Conveyor Signals & Monitoring

Product Range:

- * Face signals, communications, and remote I/O
- * Belt conveyor signals, communications, and remote I/O
- * Over-land conveyor signals, communication systems, and remote I/O
- * Underground to Surface communications.

Applications:

High production coal mining worldwide.

Product Highlights:

- * Digital data transmission giving accurate key recognition
- * Remote I/O capability for all transducer monitoring
- * Analogue and digital capability
- * Wide range of transducer support

Further Benefits:

- * Fully integrated communication and signalling
- * Simple diagnostic capability using underground approved hand-held test unit
- * Integrates seamlessly with B&F's drives and switchgear product range.

Certification:

All B&F products are ATEX & IEC certified. In addition we are able to offer other country specific certification where required.
